

Club Bag System

Made in the U.S.A

Congratulations on your purchase of the world's finest Personal Cooling System

COOLSHIRT® Personal Cooling Systems are manufactured in the USA and contain the highest quality components available. With proper installation and maintenance, your system will provide you with years of dependable service.

Please inspect your purchase to ensure that your system contains the components listed below. If there are any discrepancies, please contact COOLSHIRT SYSTEMS Customer Service at 800-345-3176 immediately.

Included with your system:

<u>Quantity</u>	<u>Part #</u>	<u>Description</u>
_____ 1	2001-0007	MobileCool Club Bag with Elegant 500hr internal pump
Optional	5005-0001	Lithium Battery Kit

System Specifications:

Dimensions
BS-C: 8"L x 6.5"W x 9"H

Cooling Time
2 Hours

Dry Weight
2 lbs.

Power Required
Water Pump: 2.0A, 12V

IMPORTANT NOTE: MobileCool Systems are equipped with a internal bladder to house the water and ice. Water and ice **MUST** be placed inside the bladder to prevent leakage.

Instructions for use:

- 1) Pour 1 quart of water into the cooling unit / internal bladder. Fill the unit with block ice or Endurance Ice and place inside internal bladder. Roll bag over and apply pressure to seal the hook and loop strip
- 2) Put on the COOLSHIRT garment.
- 3) Connect garment to Club bag. Listen for an audible “click” which ensures a good connection.
- 4) Connect to Lithium ion battery or other 12V power source. **Blue wire is negative, Brown wire is positive.** Turn on the unit.

Troubleshooting:

- 1) **Leaks:** Check to see if all fittings are properly connected. Listen for audible “click”
- 2) **Not Pumping:** recheck electrical connections.
- 3) **Water not flowing:** Check the hoses to be sure that your seatbelt or harness is not crimping the tubing. If the pump is running but not pumping water, add one more quart of water.

Maintenance:

- 1) **COOLSHIRT:** Turn the shirt inside out and wash in washing machine on the gentle cycle in warm or cold water.
- 2) Add 2 ounces of Maintenance Additive (5003-0001) in the cooling unit **with the ice and water each time the unit is used.** This will keep the pump, hoses and shirt lines clear of the buildup that occurs naturally in water circulation systems and will increase the performance and lifetime of the pump. You can also drain the hose and shirt after each use with the Universal Connector & Drain Kit (5006-0001)

All products are guaranteed for one year from the initial date of purchase for defects in material and workmanship. If you have any questions, please call COOLSHIRT SYSTEMS Customer Service at (800)345-3176. We appreciate your interest in our personal cooling products.
